## WITH THE District Agriculturist

By J. S. Duncan

### Watch For Rats

Colder weather has the rats looking for a place to spend the winter. This means that a careful watch should be kept around all buildings, particularly hog houses, chicken houses and places where food is available. Keeping all rubbish and piles of lumber, etc., cleaned up and tidy will help greatly in preventing rats from establishing themselves. Any sign or suspicion of rats should be reported at once to your Pest Control Officer.

### Cattle Improvement

Going to need a new bull next year? Now is a good time to get one. Many good bulls go to market every fall because no one wants to buy at this time of year. Any one buying a bull now can see the bull, the cows he was used on and his calves. This gives a great chance to see what you are buying. A proven bull is nearly always a better buy than a young unproven one. One other important fact is that you can buy a bull cheaper now than you can next spring. If you want to take advantage of the Dept. of Agriculture cattle improvement policy you can get full information as to amount of assistance, application forms, etc., from my office.

### Bang's Vaccination

The Bangs program will soon be getting underway again. This is a valuable program for the cattle man but in order for it to run smoothly it must be possible to handle cattle easily and quickly. A convenient cutting corral and chute with a squeeze or headgate makes it very easy to run your calves through for vaccination, branding or any other purpose. These need not be elaborate or expensive and there should be one on every farm where cattle are kept. Corral, chute and headgate plans are available from the Dept. of Agriculture.

### Vermilion Livestock Sale

This Purebred Cattle sale will be on Monday, November 12 this year. Entries for the sale must be in before October 24. Send to S. C. Heckbert, Sec.-manager, Vermilion Agricultural Society for entry forms.

## NOTICE

This is to certify that Raymond Ramsay, licensed motor mechanic, has taken over the back part of Andy's Garage. He is ready to take on repair jobs and will welcome your patronage and give good service.

## Weekly Inspirational Corner

(Sponsored by an Irma Times reader)

And God spake all these words, saying, Thou shalt have no other gods before me.

"Thou shalt not take the name of the Lord thy God in vain; for the Lord will not hold him guiltless that taketh His name in vain."

Remember the sabbath day, to keep it holy. Six days shalt thou labour, and do all thy work: But the seventh day is the Sabbath of the Lord thy God: in it thou shalt not do any work.

Honour thy father and thy mother:

Thou shalt not kill.

Thou shalt not commit adultery.

Thou shalt not steal.

Thou shalt not bear false witness.

Thou shalt not covet.

From Exodus 20.

## SPECIAL INTEREST TO YOUNG PEOPLE

The first service sponsored by the Alliance young people for the fall term will be held on Sunday evening at 8 p.m. in the Alliance church. However, the following young people's services will take place on Friday evenings commencing this week, October 19. All young people are given a sincere invitation to these meetings.

This Sunday's meeting is one of special interest and a very cordial invitation is extended to the older folks as well as the young people. A movie film, "The Land of the Long Day," will be presented. A shorter film of life in the Peace River and Yellowknife area will also be shown. In addition to these features Mrs. Sheardown will be giving a short talk on her experiences while in missionary work in Whitehorse, Yukon. Teaching for three years in the Indian Baptist School there, Mrs. Sheardown has grown to know and love the Indians in the Land of the Midnight Sun.

Everyone is given a very hearty welcome to enjoy this unusual service and participate in the bright singing and youthful atmosphere.

## Southern Sayings

Threshing and combining are still going ahead in our district and we need some more fine weather yet before all is finished.

Mr. and Mrs. Albert Jackson and family returned to the city on Wednesday after spending over a week at the J. Jackson home. Albert got his muscles hardened up by using his holiday to sling bundles on the threshing crew.

Chicken Pox is going the rounds and most of the school children seem to be generally sharing it.

## Polio Vaccine

Miss Tweedy will give second doses of polio vaccine to all pre-school children and all students who received a first dose of vaccine in the spring.

On Wednesday, October 24, clinics will be held at the following places:

Passchendale: 9:30 a.m. to 10:30 a.m.

Irma: 1 p.m. to 2 p.m.

Kinsella: 2:30 p.m. to 3:30 p.m.

Second doses only will be given at this time. Parents will be advised when further vaccine is available.

## Card of Thanks

We wish to sincerely thank all those who sent messages, cards and gifts on the occasion of the birth of our baby daughter.

Martin and Esther Creasy.

## ANNOUNCE ENGAGEMENT

Mr. and Mrs. Overt Lovig of Irma wish to announce the engagement of their eldest daughter Marian Lillian, to Victor Nesdoley of Cando, Sask. The marriage to take place in the Irma United Church on Nov. 7, 1956 at 3 p.m.

## Dr. Klein Assists

### Car Crash Victims

Six members of an Edmonton family out on a week-end drive, another city man and three soldiers from Wainwright were injured in a three-car crash west of Tofield, Sunday.

According to police, the accident occurred about 3 p.m. Sunday on Highway 14 at the corner by Lindbrook Hall.

Dr. Allan Klein of Viking was patching the scene and gave emergency treatment to the more seriously injured. They were rushed to Tofield by ambulance.

The Tofield ambulance made three trips to the scene of the accident while those injured less severely were taken in private cars.

The three cars, two of them late models, are all complete wrecks.

—Tofield Mercury.

## Home Economist Newsnotes

—Your District Home Economist, Edna M. Crals

### HELLO HOMEMAKERS:

Excitement is mounting among the younger generation. Halloween is only two weeks away. It is always a big event in the lives of our little people. Parties, "trick or treating" — and Jack O' Lanterns will be the chief topic of conversation in your homes right now, I imagine.

**COSTUMES**—Are you wondering frantically what you are going to use to make that costume for the party. If you have burlap bags or flour sacks, you have wonderful material right at hand. I can't think of a more inexpensive costume material. For the costume itself use your imagination—but it seems that Halloween is the perfect time for the hobgoblins, witches and spooks to be abroad. Don't forget the black cats, either.

**PUMPKIN**—The last canning project of the year is the pumpkin for pies. Pumpkin can be used in many other ways; here is a pumpkin jam recipe you might like to try.

**Jumpkin Jam**  
4 pounds pumpkin  
3 pounds sugar  
1 lemon with rind.

Cut pumpkin, cover with sugar and leave overnight. Cut lemon in thin slices. Cook lemon and pumpkin together until transparent. Seal in sterilized jars.

It can be used as jam or as a "sauce" for dessert. Sounds good, doesn't it.

**TIP FOR THE WEEK**—When washing your kitchen cupboards dip a cloth in warm water and saturate with lemon oil. Wipe the cupboard with the cloth, then wipe with a dry cloth. Once over lightly every few days and the kitchen cupboards are never a problem.

Are you a Tsaftsaeb Regod? I'll explain next week why you shouldn't be.

## Northern Nuggets

Maurice Miller suffered a badly sprained ankle last week when jumping out of a hay rack. He is able to get around fairly well now, but those days spent in the house, washing dishes, dishes, dishes were very hard to take, weren't they Maurice?

Rev. H. Inglis expects to be bringing some fine films to Albert this winter, provided by the National Film Board.

The friends of Mrs. Ivan Currie will be sorry to hear she is again in the Mannville hospital for treatment.

## CHURCH SERVICES

### ST. MARY'S CHURCH NOTES

There will be Celebration of Holy Communion in St. Mary's Church on Sunday, October 21 at 2 p.m.

### UNITED CHURCH

Sunday, October 21

Albert—Sunday School Bible Class 10 a.m.

Passchendale—Sunday School and Worship Service 10 a.m.

Irma—Sunday School 10:30.

Worship 11:30.

The Earth is the Lord's and the fulness thereof the world and they that dwell therein.

Come and worship.

H. W. Inglis, Minister.

### ALLIANCE CHURCH

Sunday, October 21

10:30 a.m.—Sunday School.

11:30 a.m.—Morning Worship.

3 p.m.—Viking Service in the Anglican Hall.

8 p.m.—Special Young People's Service in Irma Alliance Church.

Tuesday 8 p.m.—Prayer meeting.

Friday—8 p.m. Young People's.

## CGIT Group Will Have Something Different For This Halloween

The CGIT plan a new Halloween. Instead of asking for the usual "shell out" on October 31 this year the Senior CGIT group plan to collect pennies, dimes, quarters and dollars under Canada's new UNICEF Halloween program. UNICEF is an abbreviation for United Nations Children's Fund. This money will be turned in the UNICEF Headquarters in Toronto and from there it will go to help thousands of underprivileged children from every corner of the world.

You will recognize our group by our CGIT uniforms and identity tags which depict our purpose.

Shell out for UNICEF and give this Halloween a new meaning. Your contributions can do so much.

## Echo-Rodino

Mr. Harry Kuntz went to Edmonton to attend the funeral of a relative.

Harvesting is well on its way with favorable weather and many farmers finished threshing.

Mrs. Stella Pace of Denver, Col., is spending a vacation with her sister, Mrs. Harry Vanderwaate.

A. M. Winfield Jr. is recovering in Viking hospital.

## Holden Curling Club \$2000 Cash Bingo

Here are the numbers drawn so far:

B—7 11 8 13 6  
N—24 25 23 16 30  
N—31 36 42 33 34 44 38 45  
G—32 39 40 37 35  
G—47 52 50 51 54 55  
O—65 66 63 67 61 69

The following are listed winners of some of the bingos in the Holden Curling Club. Ties will be played off after the cash is won.

No numbers after the first 10 called—Ernie Howarth, Holden; Frank Marcinew, Mannville; Chas. F. Kallal, Tofield; Kelly Story, Holden; Nestor Deputan, Holden; A. Finseth, Ryley.

4-Corners—John Kushuta, Vegreville; J. Tupilko, Mundare; Cedor and Olsen, Holden; A. Finseth, Ryley.

St. George's Cross (plus sign) Paul Sirdar, Tofield.

St. Andrew's Cross (X) J. Tupilko, Mundare.

## CAMROSE ELKS NEWSPAPER CAR BINGO

Draw No. Bingo No.  
45 O 61  
46 I 29

Only two numbers drawn each week now till car is won.

## Chrysler Corporation Announce Advertising Policy

Windsor, Ont., Oct. 15—News-paper advertising will spearhead Chrysler of Canada's merchandising program during the next 12 months, according to R. T. Brown, advertising manager of the company.

In presenting plans to members of the company's field organization, Brown asserted that more use will be made of daily and weekly newspaper space in promoting the 1957 "Forward Look" automobiles than in any campaign the company has ever staged.

"We recognize the newspapers as the basic element in our promotional program, Brown said. "Although we will make very extensive use of all other media, our sales message, we feel, has its greatest and most continuing impact at the grass-roots level—where the newspaper and the potential customer come together."

## Glen-Coa Cleanings

Mr. E. R. Erickson is a patient at Wainwright hospital. We hope he will be feeling better very soon.

Mr. Lloyd Erickson and Bobby, accompanied by Miss Evelyn Erickson, all of Edmonton, were at the R. Erickson home last week-end.

We hear that several of our little folk are home from school with chicken pox this week. Guests of Mr. and Mrs. N. Fluevog last week-end were Dr. and Mrs. T. Lyse and family just returned from Davenport, Iowa.

Sharon Ladies Aid will meet on Thursday, October 25, at Mrs. N. Fluevog's home, assistant hostesses being Mrs. Hollinger and Mrs. T. Larson.

The Rev. C. R. Pearson, instructor at CLBI, will be the guest speaker during a Bible Conference at Sharon Lutheran church beginning Sunday evening, October 21 and continuing through Thursday evening, Oct. 25. Each meeting will begin at 8:30 o'clock. There will be no service at Sharon on Sunday afternoon.

## Kinsella News

Mrs. Bruce Barber of Vancouver who lived many years in the Kinsella district and who has been visiting her daughter and son-in-law, Mr. and Mrs. Hilson Hodgins, is at present a patient in the Royal Alex hospital in Edmonton.

Mr. and Mrs. O. Olsenberg and daughters Betty and Faye were recent visitors to the city.

Mr. J. F. Murray was a business visitor to Edmonton on Thursday.

Mr. and Mrs. E. Swanson and family of Edmonton were visiting at the home of Mr. and Mrs. J. F. Murray during the holiday week-end.

Mr. and Mrs. R. Barker and family of Edmonton spent a few days at the home of Mr. C. Barker recently.

Mr. and Mrs. O. Smith of Kilham were visiting at the home of Mr. and Mrs. Joe Beschell on Friday.

Mr. and Mrs. B. Davis received a letter from L.A.C. Murray Davis, who is at present stationed in France, with the RCAF, saying he had spent a leave in Glasgow, Scotland, with Mrs. Davis's relatives.

Mr. and Mrs. C. Smogard of Edmonton spent the week-end at the home of Mr. and Mrs. E. Simmons.

Progress on the building of the local curling rink is slow, but should improve when harvesting is completed. Shares are still being sold by the rink committee. It is good to hear of donations being given, particularly by those who will not be able to curl. The next money-making venture for the rink will be the Amateur Night and Dance on November 9.

The annual Halloween party sponsored by the W.I. will be held on Saturday the 27th. All children of the district are invited to attend.

## Jarrow News

Mr. and Mrs. Peter Olson and Paula of Edmonton and Mrs. W. Magnusson and family of Ryley were Sunday guests at the E. Skori home.

The Batts and Jarrov children enjoyed a couple of days holiday while their teachers, Mrs. Meakins and Mrs. Likness attended the teachers convention at Vermilion last Thursday and Friday.

The flu bug has been making its rounds and nearly every family has been visited in some form or another.

Mr. and Mrs. Albert Knudson and Robbie were Sunday visitors at Thoroux.

The area of the average Canadian farm increased from 124 to 279 acres between 1901 and 1951.

**KANGAROO RAT**—Shown above is one of the pair of live kangaroo rats now on display at the Saskatchewan Museum of Natural History. Eight live rodents were captured alive by Dr. Robert W. Nero, museum assistant director and Richard Fyfe, museum extension officer when they visited active colonies of kangaroo rats in sand dunes near Sceptre, Sask.

## Active Kangaroo rat colonies found in Sask. southwest

Active colonies of kangaroo rats were found in the Great Sand Hills of Saskatchewan's southwest "desert" during a recent museum expedition there, Dr. Robert W. Nero, assistant director of the Saskatchewan Museum of Natural History, reports.

Dr. Nero, accompanied by Richard Fyfe, museum extension officer, after addressing a teachers institute at Preak, visited the sand dunes southwest of Sceptre during September and found them harboring hundreds of kangaroo rats.

The discovery of the colonies was made by a naturalist farmer, Frank Buschell of Sceptre, who corresponded with the museum following a newspaper article on the discovery of a dead kangaroo rat at Portreeve in July, 1955. This rat was only the third specimen previously found in Saskatchewan.

Accompanied by Mr. Fyfe and

## First Metis Co-op at Green Lake

The first co-operative in the Green Lake Metis Settlement was incorporated and registered July 17th.

Known as the Green Lake Settlers' Co-operative, Limited, Green Lake, Saskatchewan, the first co-operative venture of the Metis people is that of a general store, mainly groceries and sundry items. It is presently located just outside the hamlet of Green Lake.

"This is the first time that the Green Lake Metis have inaugurated a program entirely on their own initiative," John McIntosh, deputy minister of municipal affairs, commented.

The new co-operative is purchasing the majority of its supplies from Federated Co-operatives Limited in Saskatoon, through the Co-op store in Meadow Lake.

## Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or smile? Don't be annoyed and embarrassed by such handicaps. **FALSE TEETH**, an alkaline (non-acid) powder to sprinkle on your plates, keeps false teeth in place and gives them the feeling of security and added comfort. No gum pain, no sore spots. Get **FALSE TEETH** today at any drug counter.

## A new look at summerfallow

So accustomed over the years has the average farmer in Western Canada become to the practice of summerfallowing, that any suggestion to the effect that he might be able to get along without it will have to be accompanied by clear and unmistakable evidence, that it would pay him to follow a system of continuous cropping or a summerfallow-free rotation. Certainly, the opinion of many leading agronomists is veering more and more to the firm belief that, in areas where rainfall is not a limiting factor and where there is no weed problem which cannot be met with chemicals, the summerfallow operation can be largely eliminated. More than that, they say, continuous cropping in such areas, when it is accompanied by the proper use of phosphate and nitrogen fertilizer can mean higher yields and even when moisture is deficient, if the shortage is not too severe, a high nutrient status will largely offset the moisture deficiency, the fertilizer crop making more efficient use of the available moisture.

The matter of costs is, of course, an important one and it is recognized that a point is reached beyond which it does not pay to apply more fertilizer if maximum dollar returns per acre are to be realized. Eventually perhaps when the matter of costs and probable returns per acre are better understood and where there is more certainty about being able to deliver all the wheat that is raised, more and more farmers in parts of Western Canada will explore the possibility of eliminating summerfallow and of growing cereals and other crops more or less continuously, having regard to suitable rotations and adequate fertilization of the land. Any change in the system followed at present, however, is likely to be a gradual one.

## Strictly Fresh

A parachutist was arrested for reckless driving but a friend bailed him out.

A calf in California has been named Elvie Presley because, says the owner, "The animal has been bawling since it was born."

One political observer started watching Hawaiian hula dancers.

Said he was told to keep an eye on the grass-roots movement.

Prestige is what you try to keep up with the Joneses in so that you won't be without when the only thing that'll carry you through is...

Wonder if they'll ever come out with a king-size filter with a tobacco tip.

## On The Side: E. V. Darling

Turf expert Pete McEvoy, the Brooklyn expatriate, who now lives in California, is still driving a Cadillac sedan he purchased in 1928. Pete has made 15 round trips between Brooklyn and Los Angeles in this car. Also worthy of note is that he has been driving automobiles since 1913 and has yet to receive a ticket for any kind of a traffic violation. Not even an overtime parking ticket. Some record for 43 years of driving.

**Open for discussion**  
What is the origin of the saying, "The Life of Reilly"? That is a question that has often been discussed but never settled. Some claim it has a reference to a hotel keeper named Reilly, which is an error. The hotel keeper they are thinking of was named O'Reilly, as in the song, "Are You the O'Reilly That Keeps the Hotel?" Others say it has to do with a man who was very friendly with a certain Mrs. Reilly while her husband was off on a trip. It was said of this man that he "lived the life of Reilly while Reilly was away."

**A hint for husbands-to-be**  
Do women want to be dominated by their husbands? Or does the average wife want to rule the roost? That is a question constantly discussed. According to our men and women experts, the average wife welcomes a degree of domination. She wants to have her say in the management of the household. But doesn't want the last word. She wants a man who will make decisions and take responsibility. If you are contemplating matrimony young fellow, keep that in mind.

**A quiz question**  
Are you in shape to win a jackpot on one of those quiz programs with general information as a category? If so, what is the largest army in the world? The correct answer is the Chinese army with five million members. Second is the Soviet with over four million. Third is the United States with under two million in the armed forces.

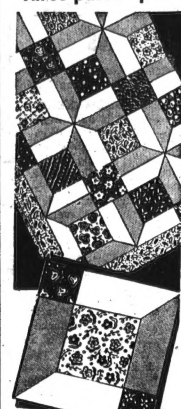

**Musical appreciation from males**  
"I may be forty but I still rate whistles." Women who have retained their youthful figure frequently say that, or words to that effect. I have also noted shapely beauties described as having a "whistling figure." However, whistling as an attractive female passes by is rated a breach of etiquette. Perhaps it shouldn't be. Consider what a morale builder a few whistles are to some women. Perhaps the etiquette experts can be persuaded to approve of a discreet complimentary whistle. Also some enterprising manufacturer should make a whistle to use as a means of expressing admiration for a passing female. A whistle with a long, low, sweet tone.

**"Sacking" the southwest**  
Is a left-handed right-hander more valuable to a team than a right-hander? In my opinion he is not. The claim of the supporters of southpaw initial sackers is that such men basemen are better qualified to figure in plays calling for throw to other basemen. That is too slight an advantage to merit such consideration. Right-handers are steadier than left-handers, who are usually temperamental and easily rattled. They are also inclined to fancy "show-off" playing such as overdoing the one-hand catch.

## The Pattern Shop

### Fashions

#### Three-patch quilt

7003  
by Alice Brooks

Use up scraps of fabric—make a gay patchwork quilt this easy, thrifty way! Make pillow too, for summer lounging on porch or lawn. Three simple patches—repeated, form a lovely design.

Pattern 7003: Pattern, charts, directions for three-patch quilt.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to: Household Arts Department, Department P.P.L., 60 Front Street W., Toronto.

Two FREE patterns—printed in the new Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home—just for you, our readers! Dozens of ready designs to order and use—fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

## ROAD TOLL STILL RISING

Saskatchewan may be heading towards a new but unenviable record in 1956—a record number of highway deaths in motor vehicle accidents. By the end of August, more than 60 persons had met death on the road in the province, representing a major disaster for relatives, friends, and the province as a whole.

During the past decade, almost 1,000 persons (equivalent to the population of an entire town) have perished on Saskatchewan's streets and highways. And highway traffic officials point out that, if the rate of fatal accidents continued at its present level, another 1,000 will have been killed by 1964.

### NEW PRINTED PATTERN MORE ACCURATE

#### Each One Yard 54"

4762  
PRINTED PATTERN

It's our new PRINTED Pattern! What a saving buy for you! ONE yard 54-inch fabric is all you need for each of these styles, short-sleeve blouse, jersey, and skirt. Make them in jiffy time! Printed Pattern 4762: Misses' Sizes 10, 12, 14, 16, 18. Blouse, jersey, skirt; each take 1 yard 54-inch fabric in all given sizes.

Directions printed on each tissue pattern part. Easy-to-use, accurate, assures perfect fit.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly: Name, Address and Style Number to: orders to:

Anne Adams Pattern Dept., Department P.P.L., 60 Front Street W., Toronto. Be sure to write plainly your Name, Address and P.P.L. Number.

## U.S. sell farm produce to Japan

The United States has agreed to sell another \$55.5 million worth of farm produce to Japan for Japanese currency, bringing to the total foreign currency sales to that country to \$150.5 million. Included in the latest sale for yen are 17 million bushels of wheat worth \$27.5 million, 4.5 million bushels of barley valued at \$4.5 million and 5 million bushels of corn and other feed grains costing \$6.4 million.

### IN THE HOME WORKSHOP

#### Novel table

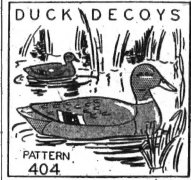

This novel table and the bunny chairs will make your children's dining and play time the gayest in town. Where there are no children in the house the table will make an interesting coffee table for a game room or terrace. These

pieces are made from three-quarter inch solid stock and the bunnies are traced directly onto the wood from the pattern, which also shows exactly where to place each shade and color for realistic effects. See sketch for pattern numbers and enclose 35c for each pattern ordered.

## They might fool you

These decoys are "big as life and twice as natural"—beautifully rounded and water-proofed in realistic colors. Yet, they are easy to make by building up wood sections

that are no trick to cut. Pattern 404, which gives actual-size guides and shows every step, will be mailed for 36c. It is one of five patterns in the Sportsman's Packet for \$1.50.

FREE CATALOGUE upon request. Address order to: Home Workshop Patterns, Department P.P.L., 4438 West 5th Avenue, Vancouver, B.C.

## WATER-TANK HEATERS

Canadian factory shipments of electric domestic water tank heaters to the end of June this year declined to 132,563 from 158,054 in 1955, and of gas-fired heaters rose slightly to 20,093 from 19,709.

## PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE HANBY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

## Sweet Treat

And so easy with fast-rising Fleischmann's Active Dry Yeast... a treat that will bring demands for "more, please!"

### Honey Bun Coffee Cake

- In an 8-inch square cake pan, melt 3 tablespoons butter or margarine. Drizzle with 1/2 cup honey and sprinkle with 1/2 cup broken salted nuts.
- Scald 1/2 cup milk. Remove from heat and stir in 1/4 cup honey, 1/2 teaspoon salt, 1/4 cup shortening. Cool to lukewarm.
- In the meantime, measure into a large bowl 1/2 cup lukewarm water, 1 teaspoon granulated sugar and stir until sugar is dissolved. Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast. Let stand 10 minutes, THEN stir well. Stir the lukewarm milk mixture and 1 well-beaten egg 1/2 teaspoon vanilla into the yeast mixture. Sift together once 2 cups once-sifted all-purpose flour 1/4 teaspoon ground cinnamon.
- Sift dry ingredients into yeast mixture and stir until well blended—about 1 minute. Spoon mixture into prepared cake pan. Cover. Let rise in a warm place, free from draft, until doubled in bulk—about 1 1/2 hours. Bake in a moderately hot oven, 375°, about 35 minutes. Turn out of pan immediately. Serve warm.

**Needs no refrigeration**

## Wives now work regardless of size of husband's income

Fifty percent more women work today than were employed 15 years ago. The current total is one-third of all persons employed. Married women now work regardless of their husband's income, and working wives now outnumber working bachelor girls more than two to one, states the Reader's Digest. Women now go to work because they want to, and working rather than being at home (except during the years when the children are young) has increasingly become the "natural" thing to do. An expanding economy has given us full employment, and there's a definite labor shortage, says Reader's Digest. Employers, feeling the pinch, are more willing to hire older women and housewives for part-time jobs (in department stores, for example, to meet peak customer loads during the middle of the day).

Free time for the housekeeper is made available by modern household facilities. Education, now universal, gives many women a vocational urge that homemaking alone cannot satisfy. Most significant, perhaps, is the

hunger for the "good life" that multiple income brings. The working married woman wants a house, the consumer goods that go with it, and savings to send the children through college. These sober impulses are mainly responsible for the enormous boom in consumer goods during the past 10 years, the Digest points out.

Women at work create a problem of high turnover for many companies, but sex problems in the old-fashioned sense of the term, which personnel men once feared would occur with high frequency, have not amounted to much. As one union steward told an automobile plant ironically reported: "The chief complaint is that everybody is too tired for sex!"

## Coyotes raid north farms

Coyote population in outlying districts is mounting, and the predators have begun raiding farmyard livestock. A. W. Beattie, district Ag Rep reported recently. Reports have already been heard of considerable lamb, poultry and calf losses in districts bordering on undeveloped section of the north "Peace." In a counter-move, agricultural officials are supplying farmers in the affected areas with poison pellets in an effort to thin the number of coyotes in the district.

Most of the sudden upswing in coyote losses has been credited to natural increase in population. Coyote pups are now entering the season where they begin foraging over wider areas for food. Agricultural officials said such concentrations of coyotes pose a threat to residents, for, should rabies break out under such conditions, it would probably be spread rapidly by the animals.

## Blue baby and the well

When a baby under the age of 10 months has a persistent blues, if he is on formula made with well water, the child should have medical attention. The water supply, if from natural sources, should be tested for excess of filtrates, a form of pollution that does not affect children over 10 or adults. Water which goes through a filtration process in towns or cities does not present this danger. Since well water may change conditions with the seasons, it is safer to have such water tested for nitrates more than a month previous to its use in an infant's formula.

HE HAS TOO MUCH MONEY—G. E. P. Alsem, of Amsterdam, Holland, has monetary troubles—an abundance of money of all different kinds. Alsem, an airlines flight engineer, sometimes has to carry 25 varieties of money from all over the world. The Dutchman, whose globe-trotting has extended over 27 years and 27,000 flying hours, often finds making change difficult.

## Importance of balance to life of automobile tires

Recently, a car owner came driving into the Service Department of his local dealer. The car wasn't steaming, but he was. "These tires should be good for a long time yet," he told the Service Manager, "but they are starting to give me trouble."

The Service Manager began an inspection. On each of the tires, he found, one side was so badly worn that the tread had almost disappeared.

"How could that happen?" the owner asked. The Service Manager replied with a statement supported by his Service Department records: "You have never switched these tires since you've owned the car!" Somewhat embarrassed, the owner answered, "I didn't think it made much difference."

The Service Manager then explained that it DID make a difference. In normal use, the rear tires wear faster than the front, right tires wear faster than the left. By regularly rotating the tires—including the spare—a driver can sometimes increase tire life as much as 25 percent.

The Service Manager pointed out other factors that affected the life of a tire. Improper wheel balance and faulty front-end alignment can take miles off tires. "Often," he went on, "we give our cars a severe jolt without realizing it—hitting a deep chuck hole or bumping a wheel against a curb can sometimes do it."

The happy result of this incident is that this owner is now rotating his tires regularly. Also, from time to time, he brings his car in to have the wheel balance and alignment checked.

### USEFULNESS

That best portion of a good man's life, His little, nameless, unremembered acts of kindness and of love. —William Wordsworth

To do good to all because we love all, and to use in God's service the one talent that we all have, is our only means of adding to that talent and the best way to silence a deep discontent with our shortcomings. —Mary Baker Eddy

No one is useless in this world who lightens the burden of it for any one else. —Charles Dickens

So long as we love we serve; so long as we are loved by others, I would almost say that we are indispensable; and no man is useless while he has a friend. —Robert Louis Stevenson

—Robert Louis Stevenson

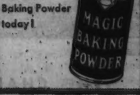

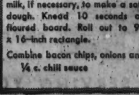

## EVERYBODY WILL LOVE TASTY Bacon & Cheese Ring!

Fry together, then drain well:  
8 slices cut-up side bacon  
½ cup finely-chopped onion  
Sift together once, then into bowl:  
2 c. un-sifted pastry flour  
or 1½ c. un-sifted all-purpose flour  
4 tps. Magic Baking Powder  
¼ tsp. salt  
few grains cayenne

Cut in finely:  
¼ c. chilled shortening  
Mix in:  
¾ c. shredded cheddar cheese  
3 tps. finely-chopped parsley  
Make well in dry ingredients add:  
¾ c. milk  
and mix lightly with a fork, adding milk, if necessary, to make a soft dough. Knead 10 seconds on floured board. Roll out to 9-10 inch rectangle.

Spread on dough. Beginning at a long edge, roll up jelly-roll fashion. Bring ends together to form a ring, seal. Place on ungreased cookie sheet. Cut 1-inch slices almost through to centre with scissors, then each piece partly on its side. Bake in a hot oven, 450°, 15 to 20 minutes. Yields 1 ring.

MAGIC's steady, even rising action brings out all the best in your other fine ingredients. Cut tighter, more delicious baked goods... buy MAGIC Baking Powder today!

## Leafy spurge spread poses serious farm problem in West

Leafy spurge is a serious weed throughout western Canada and appears to have spread widely in recent years. Cultivation control usually involves up to three years of intensive summer-fallowing or the continual use of herbicides.

There are many areas to which the above-mentioned control measures are not applicable. These are areas of light soil where wind erosion is an ever-present danger. Stony areas where machinery cannot be effectively used, areas of native grassland that have been invaded by the weed and marginal lands on which inexpensive, yet effective control measures must be devised.

At Pearce, Alberta, an area of light sandy soil became badly infested with leafy spurge some years ago, states A. Johnston, Experimental Farm, Lethbridge, Alberta. The control measures adopted involved seeding the area to crested wheatgrass and pasturing the resulting mixed grass-weed stand with sheep. This procedure has reduced the stand of leafy spurge by 91 percent in the last four years.

From the standpoint of practical management, it was noted that sheep eat leafy spurge readily when the weed is from one to three inches in height. If turned into an area in sufficient numbers to keep it grazed down to this height, the weed will be eaten throughout the grazing season. This is especially noticeable during midsummer when crested wheatgrass becomes wiry and unpalatable. If turned in at later stages, leafy spurge is not readily eaten and some losses from poisoning, attributed to the weed, may be experienced.

An indication of the selective nature of sheep grazing is seen in the fact that the total number of weed species present has been reduced from 11 species in 1952 to 7 in 1955.

While complete eradication of leafy spurge has not yet been accomplished by the treatment described, good control of the weed has been obtained. Further, a bad-

### Viking Creamery Win Prizes

The Viking Co-operative creamery has been doing well in butter exhibitions for 1956.

At the Brandon, Man., exhibition with one entry they won first prize in group one.

At the C.N.E. exhibition at Toronto, with three entries, they received first prize in group 2,

and second in group 1.

At the London, Ont., western fair with three entries, the creamery was awarded first prize in group 2, and second in group 1.

In five-highest scoring samples in sections entered the creamery was awarded reserve champion ribbon with fourth prize.

This is indeed a most creditable showing.

The graders, Lou Pratt and

Clayton Patton, buttermaker, Len Carrington and plant supt. Cliff Studholme deserve a great deal of credit. There is keen competition at these fairs and many large creameries are represented at the exhibitions.

Forty per cent of Canada's population is in the under 14 years and over 65 years age group.

### Young Boy Injured In Gun Accident

(From The Viking News)

Glen Sather, young son of Mr. and Mrs. C. Sather, was injured in a gun accident last Thursday afternoon, about half a mile north of the hospital when a bullet from a .22 rifle entered the calf of his left leg. He was taken to the hospital for medical attention and was discharged from the hospital on Monday.

A group of young boys had gotten possession of three .22 rifles and went to do some target shooting at a "cove" in the bluffs on a farm north of the hospital. In some manner, while Glen was aiming at the target, one of his companions behind him discharged a rifle and the bullet hit Glen in the leg, causing a flesh wound. From all accounts it could have been more serious.

### Viking Student Wins Governor-General's Medal In Holden S. Div.

Hubert Eric Morgan, a grade nine student at Viking, won the Governor-General's Medal for achieving the highest marks in the Holden School Division on the Departmental Examinations, June 1956.

### AUCTION SALE DATES

By J. L. Muirhead, Auctioneer, Sedgewick, License No. 90.

Production of chewing tobacco in Canada in 1955 amounted to 1.3 million pounds, less than half the 1945 output.

### Mrs. Basil Hilliker Laid Corner Stone

### Corner Stone Laying Service At New United Church

Thursday, October 11, was a memorable and historical day for the Viking United Church when the corner stone of the new church now under construction was laid. It was a beautiful autumn day and the sun shone brightly as the audience gathered to join in the ceremonies conducted by Rev. Clinton Swallow, pastor of the church, beginning at 4 p.m.

The order of service opened with singing of the hymn, "The Church's One Foundation," after which the minister said "Dearly loved in the Lord, we are gathered together here to lay the foundation stone of a building which we humbly trust may in due time be consecrated as a house of God." He then read Psalm 84 and verses from Ezra 3: 10, 11.

After this the ceremony of laying the corner stone began with the following words by the minister and response by the people:

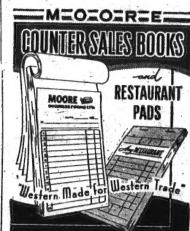

Minister: Our help is in the name of the Lord;  
People: Who made heaven and earth;  
Minister: Blessed be the name of the Lord;  
People: From this time forth for evermore;  
Minister: Behold I lay in Zion a chief corner stone, elect, precious;  
People: And he that believeth in Him shall not be confounded;  
Minister: The stone which the builders refused;  
People: Is become the headstone of the corner;  
Minister: This is the Lord's doing;  
People: And it is marvellous in our eyes;

Minister: Other foundation can no man lay that that is laid;  
People: Which is Jesus Christ. Prayer by the minister.

The corner stone was placed in the southeast corner of the building, and Mrs. Basil Hilliker was called upon to lay the corner stone, which she did, saying: "In the faith of Jesus Christ, we place this Stone in the Wall; in the name of the Father, and of the Son, and of the Holy Spirit, Amen."

It is to be noted that Mrs. Hilliker, who now makes her home in Edmonton, was a citizen of Viking and was present when the Methodist church was dedicated in 1908, which the new building is replacing.

In fact there are three stones, one representing the church built in 1908 which later became the community church in 1918 when the protestant churches of Viking joined together as a community church preceding the

## Former Viking Boy Is B.C. Cabinet Minister

Leslie Raymond Peterson will be one of the youngest cabinet ministers in B.C.'s history. He is a Vancouver lawyer.

Mr. Peterson has been elected to the legislature twice this year as a Social Credit, having joined the party in 1952. He won his first bid for provincial office in the January Centre by-election, re-won with surprising strength when he topped his running mate, Alex Matthews, and took over 50 per cent of the Centre vote.

At 32, he is the youngest member in the new government benches.

Born in Viking, Alberta, he worked on his father's farm and with Canadian National Express until 1942, when he joined the Royal Canadian Artillery. He is the son of Mr. and Mrs. H. S. Peterson, formerly of Viking, now resident in Vancouver. Leslie was a student at Camrose Lutheran College in 1942.

He was selected to take a one-year science course at McGill University. He served in Belgium and Holland with the medium artillery and entered Germany with British troops. After V.E. Day he was one of a group of Canadian soldiers to attend London University.

A year later he returned to

Canada and entered UBC law school. He graduated in 1949. Recently his firm of Peterson and Anderson amalgamated with a second partnership to form the firm of Boughton, Peterson, Anderson, McConnell, Dunfee, Jensen and Lorimer.

Following his first victory at the polls, just nine months ago, he won Premier Bennett's admiration with a forceful maiden speech followed by an important committee victory for the government.

Mr. Peterson campaigned in the recent provincial election on the government's record plus some ideas of his own. One was advocacy of higher exemptions from sales tax on restaurant meals. Another was for a more concerted provincial-municipal church and service club sponsorship of senior citizens' housing.

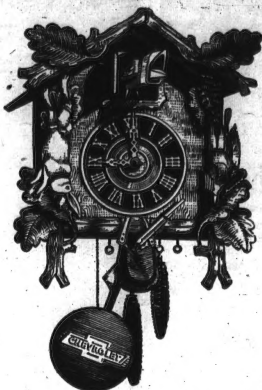

The new minister and his wife Agnes have a son and daughter, Raymond, 4, and Karen, 2. Physically, Education Minister Peterson is 6 feet tall, blond and striking. In his new job he will have the benefit of his multi-university training and continuing close connections with UBC faculty members.

Viking and district join in extending congratulations to Hon. L. R. Peterson.

At the beginning of this year there were 6,600,000 Canadians covered by voluntary hospital insurance plans, an increase of 2,140,000 in the preceding five year period.

In ancient times a body of water known to scientists as Lake Agassiz covered three-quarters of Manitoba and extended into Ontario and the United States.

## Wise birds wait!

They don't go out on a limb for the first new car they see. That figures. Because it just naturally takes a little longer to bring out a car that's sweet, smooth and sassy. Like the new '57 Chevrolet. It's new right down to the wheels it rolls on — with a daring new design, a new nothing-like-it automatic drive and a new V8 besides. Longer and lower, too. No wonder wise birds are waiting. Are you one?

## News Report From Edmonton

By Ken Mason

EDMONTON—The cash register continued to jingle a happy tune for the Alberta treasury during the fiscal year which ended last March 31.

The province raked in an all-time record \$241,608,105 in revenue, an increase of \$80,422,959 over last year, and most of it due to higher prices paid for oil and gas rights.

Spending for the fiscal year also topped previous records, totalling \$132,028,520, or an increase of \$22,804,589 over the figure for the previous 12 months.

But the happiest part is that after all financing was done, the province had a surplus of \$15,989,544 for the year's operations. And this is particularly cheerful news when compared with the situation last year when the government had to dip into its accumulated surpluses for \$12,664,795 to make ends meet.

The figures were released last week by Keith Huckvale, provincial auditor, in his annual publication of the public accounts book, a hefty volume which tells the complete story of government operations, down to the last penny.

Once again, oil and gas development told the big story in the financial picture of this oil and agriculture province, which some government officials think may need a sales tax.

Sale of crown reserve oil and gas leases and reservations netted \$71,931,568. Fees and rentals brought in \$19,869,509, and royalties earned \$26,610,868.

The federal-provincial tax rental agreement was another major source of income, bringing in \$31,592,934 from Ottawa. Taxes earned another \$26,643,263. Profits of the liquor control board amounted to \$15,821,036, from gross sales of liquor and beer totalling \$54,770,085.

Bigger grants for schools and hospitals are mainly responsible for the boost in expenditures during the year. An increase of nearly \$13,000,000 in the cost of education was due almost entirely to higher school grants.

The largest single item of expenditure was \$48,165,257 for public welfare, institutions and charitable grants. Education cost a total of \$37,770,426, while roads, bridges and ferries added another \$15,697,120 to the cost of running the province for the year.

The accounts also show that Alberta's public debt picture is still rosy. Total indebtedness is \$91,567,106, but cash on hand and readily disposable investments exceed this more than 3 times.

Business, it seems, is good.

IRON CURTAIN—The legislature's liquor investigating committee resumed meetings in the capital city last week and immediately wrapped itself up in a cloak of secrecy.

The case in point is submissions by police forces throughout the province and by the liquor control board. The city police forces and RCMP answered questionnaires sent to them by the committee, and liquor board chairman George Clash was invited in to talk things over with the committee.

Later, committee head Edgar Gerhart (SC — Edmonton) said his group had decided against disclosing any details of the police and liquor board views.

Why? The members don't seem to know for sure themselves, but the official answer was that since the information was requested by the committee, it became the exclusive property of the committee, and therefore should be kept a secret unless the legislature demands to see it next year.

Apparently, since the committee asked specifically for the memoranda, they are in a different class from briefs presented last spring by 100 or more organizations. Could it be that more importance is being attached to the police and liquor board views?

Or, like so many public bodies made up of elected representatives, does the committee believe a few deep mysteries will add to its stature?

The committee already has started working on the first draft of its report, which should be finished by the middle of December.

## Need 12 years to produce wheat type

Eight to 12 years is generally considered necessary to produce a new variety of wheat. This is the period from when the cross is made until the resulting variety is licensed and distributed.

Strictly speaking, however, the new variety is actually produced in about half of this time, as the remaining period is primarily a testing phase.

Extensive tests are necessary to ensure that a new variety has high yield over a large area, and that its bread-making qualities are adequate. Maintaining Canada's high standards of quality is the greatest difficulty in the production of new varieties.

The production of a new variety from the time of the cross to the beginning of yield testing, requires on the average, six generations of growing. With the aid of greenhouses, and winter nurseries in Mexico, this can be reduced to three or four years. The increase of seed stocks prior to distribution can also be hastened by growing them in the United States or Mexico during Canada's winter months.

A great deal of the testing, however, can only be done during the summer by growing plots under field conditions. In the early stages of testing there is a large number of potential new varieties. These are grown at several places within a limited area. After two or three years the most promising of these varieties are then advanced to the "Co-operative Tests of Common Wheat Varieties". These are a series of tests grown at 23 different locations in Western Canada by Experimental Farms and Universities. Extensive information is obtained on disease and insect resistance and on yield and other agronomic characteristics. Grain harvested from these 23 places is subjected to milling and baking tests to provide quality information.

A new variety, as a general rule, undergoes three years of Co-operative Tests before being licensed.

### Snow a protective blanket

According to nurserymen, a good covering of snow is the best protection against winter injury to perennials. A mulch of straw put on perennial roots after the ground is frozen helps to prevent heaving during periods of alternate thawing and freezing.

### Ready for hunting

"Better be safe than be sorry." So, whether you have one gun or several, put your mind at ease by making one of these racks. Pattern 405 gives actual-size cutting

### How To Hold FALSE TEETH

### More Firmly In Place

Do your false teeth stay loose, wobble, or slip out of place? It's because you're not using the new **FASTENITE** on your teeth. This safe, painless, non-toxic powder holds false teeth more firmly and more comfortably in place. (Don't use soap, sticky paste or tooth powder. Don't use "glue" or "cement" (denture glue). Get **FASTENITE** today at any drug store.

### Helps You Reduce Swollen Painful Piles

Here is a safe, clean, easy way to get relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pills or suppositories.

The secret is in taking just one small **HEM-HOLD** tablet with water, two or three times a day. Works through effective **INTERNAL** action. Causes no irritation. No side effects. **HEM-HOLD** is a safe, reliable, and effective remedy for hemorrhoids. Helps shrink piles and prevents them from coming back.

Why suffer needlessly when **HEM-HOLD** does you so much good? A package of **HEM-HOLD** has six tablets. **HEM-HOLD** is so low, low effective it's not even a habit. All drug stores. Low cost. **HEM-HOLD** if you are not 100% pleased.

### Sign of economic health

(From The Virden Empire-Advance, Virden, Man.—July 11, 1956)

Canada continues to have an adverse balance of trade with the rest of the world. That means we are importing more than we export. Most of this so-called "unfavorable" balance of trade is in our dealings with the United States. Roughly speaking, for every two dollars worth of goods we ship to the United States, we buy three dollars worth.

There may be a tendency to construe this as a weakness in our economic fabric which cannot be reconciled with evidences that we are enjoying unprecedented prosperity. This might be true with respect to some countries. But, as Mr. Howe pointed out recently in Parliament, our unfavorable balance of trade is a sign of health.

Canada is in somewhat the same economic position today as the United States was after the civil war. She leaned heavily on Britain for machinery and equipment to lay the foundation for the utilization of U.S. resources which eventually put our neighbor in the forefront of the world industrial revolution. The United States today is playing the role for us that Britain played for our neighbor in the last century.

This new machinery and equipment has helped us in the last decade develop our oil, iron, power and chemical resources. Secondary industries spring up to utilize the new raw materials. The importation of capital has spurred on this progress. It has offset our adverse balance of trade in our international exchange settlements. But it is hastening the coming of the day when we will be less dependent upon imports.

What has happened with respect to oil illustrates how this works. At one time, not many years ago, we were dependent almost entirely upon foreign sources for our petroleum energy. Today, we are just about able to meet our requirements, and we actually export oil to the United States. This change was inevitable. But its coming has been hastened by machinery and capital imported from the United States. Now, by exporting petroleum, while our imports have been cut sharply, we are in the happy position of being virtually independent of foreign sources for this essential commodity. Furthermore, we have been saved an even greater imbalance in our trade by the development of our domestic resources.

### Crossings always hazardous

(From The Brandon Daily Sun, Brandon, Man.—September 21, 1956)

The regrettable railway crossing accident which took the lives of two men recently near High Bluff, emphasizes over and over again the never-ceasing caution and vigilance required by drivers. Death lurks at every crossing, and the mounting toll of fatal accidents this year illustrates too clearly that we have not yet learned the true values of safety practices. Millions of words are written annually stressing greater precautions and hundreds of thousands of pamphlets are directed into drivers' hands, but still we are compiling an unenviable record for accidents.

On double track lines, there is a need for drivers to be doubly cautious. One train in sight may be approaching the crossing, while another moving in an opposite direction may not be heard. A sudden urge by a motorist to get over the crossing after the first train clears, might put him or her right in the path of the second train. This has been the case in many accidents reported within the past two or three years in Canada. If a driver hesitates long enough to get a clear view of both tracks for half a mile or so, his safety will be assured. But in a world of speed and hurry, we are prone to forget a safety rule of that kind, and with fatal results.

Installation of proper signals, under-pass and over-pass crossings, and even watchmen, have done much to improve safety conditions. New highways are being built to escape railway crossings, and it may be that in time level crossings will be eliminated altogether. Until this latter time arrives, however, the individual must keep close guard over his or her driving habits. We must be vigilant every moment we are on the highways, although here too we are lulled into security by the fact that we prize ourselves in good driving in heavy traffic. There is no loophole for escape from danger if we become careless or complacent. Eternal vigilance is the price of safety.

### More children killed by poison than polio

(From The Mail, Drumheller, Alberta—August 22, 1956)

Accidental poisoning kills more young children than polio, diphtheria and scarlet fever combined on the North American continent. Every year thousands of poison victims are rushed to hospitals and doctors' offices. The great majority are children who have swallowed common household pills, powders, pastes or fluids. Some of these children die before aid reaches them, or because neither parent nor physician knows the identity of the poison in the offending substance. Thousands of others suffer injuries to the throat and stomach or develop dangerous secondary ailments like bronchial pneumonia.

Labels on foods and drugs must warn of dangerous ingredients, but this often does not apply to many household substances. It's important to know the chemical contents of a product swallowed by accident, because first aid measures vary. If the poison is a strong acid or alkali, vomiting may burn the esophagus.

Training nurses who investigated cases of poisoning referred to a health centre found that nine times out of ten the accidents could have been avoided.

Parents are advised to make a room-to-room check for poisonous products and to keep them out of a child's reach and sight. Cleaners, bleaches and disinfectants should be kept in their original containers on the upper shelves of the kitchen closet and drugs and medicines should if possible be kept under lock and key.

**POPULAR NEW ANGLING SPOT**—Here is an example of why sport fishing is becoming so popular at Lac la Plonge, northwestern Saskatchewan's newest angling spot. W. H. "Burr" Sandherr, (left), local tourist camp operator, and Larry Landry, his camp manager, show how it's done. That's an 18-pound northern pike that Landry is holding—and many of them come bigger.

### Manitoba butter production down

Manitoba's butter production for the first seven months of this year showed a 4.1 per cent decrease from the same period in 1955. C. H. P. Killick, provincial dairy commissioner, reported. As yet, the number of milk cows is greater—208,000 in June, 1956, as against 201,000 last year.

However, fluid milk and cream sales were up in Manitoba. Figures for the first six months of this year showed a seven per cent increase over the first half of 1955.

### THAT APPETITE

The teenager needs good nourishing meals, the same foods as the rest of the family but in larger quantity. During this period, boys and girls are growing fast, are exceedingly active and require extra nourishment to provide this energy. Boys don't worry much about their extra poundage but girls are more likely to skip meals in order to remain slim. It is much safer and more effective to eat meals patterned on Canada's Food Rules, which will help to keep the figure normal without putting on too much weight.

### Mobile hospital for Civil Defence

The first mobile hospital unit for civil defence was tested at Armory.

A 200 bed hospital unit, complete with X-ray and operating rooms, was set in operation in 55 minutes in its first field test, and federal Civil Defence officials said they hope to establish some 30 of them strategically throughout Canada.

The unit, designed by a Canadian CD medical group to embrace the best features of similar U.S. and British units, rolled into Canada's CD college aboard six big army trucks.

Within 55 minutes 200 cots with pillows and blankets were set up in a drill hall roped off to simulate a 10 room rural school. Also ready for the first casualties were three complete operating rooms, an X-ray unit, a pharmacy, laboratory, sterilizers, and a generator and collapsible rubber water tank and power pump which make the unit independent of local power and water facilities.

The unit—when fully organized it will be completely manned by CD personnel—is worth an estimated \$30,000.

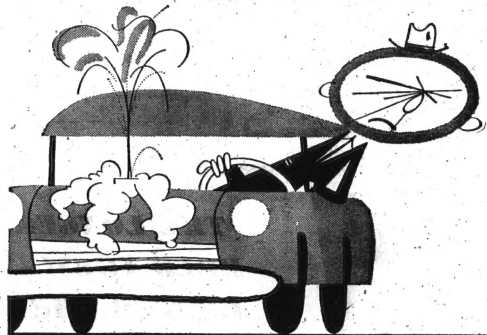

U.S. army cots used will later be substituted by a collapsible aluminum cot, to be manufactured in Montreal. It is higher than the army cot, thus giving nurses better access to patients without stooping.

All the equipment will be interchangeable with U.S. mobile hospital units.

### DOG DAYS

The expression "dog days" originated in ancient Rome when it was believed that the simultaneous rising of Sirius, the dog star, and the sun caused the hot and humid weather of mid-summer.

## Don't stick Your neck out!

Insist on the anti-freeze that takes over where others stop

## PRESTONE BRAND ANTI-FREEZE

If you want your car to run smoothly and economically this winter, the cooling system has to work efficiently. Freeze-up protection is less than half the battle. Almost any anti-freeze prevents freezing—but "Prestone" Anti-Freeze guards against foaming, rust, clogging, ruinous corrosion—and will end overheating hazards which help cause low gas mileage and excessive piston wear.

So don't believe it if you hear that all anti-freezes are the same. Don't stick your neck way out. "Prestone" Brand Anti-Freeze with Polar Film gives you freeze-up protection PLUS... the cooling system conditioning you must have to keep your engine running smooth and easy all winter long.

Insist on "Prestone" Anti-Freeze! Look for the "Green Tag" attached to the radiator, your assurance that "Prestone" Brand Anti-Freeze has been installed.

"Prestone," "Surely" and "Polar" are registered trade marks.

## Diabetic society functions given

Functions of the Diabetic Association are outlined in an article especially prepared for the current issue of Health Magazine, official publication of the Health League of Canada.

The Association cannot do much for the diabetic who is already in a serious condition, but it can do a tremendous amount to help diabetics of today and of the future. The way it promotes good health across Canada is by:

1. Encouraging early detection of diabetics—a urinalysis should be a part of every medical check-up at no extra cost.
2. Having instructions available immediately upon detection, both regarding methods of injection, sterilization and purchasing of equipment and regarding variations of diet within the doctor's prescription—yet within budget and taste of the individual diabetic.

3. Having the necessary food, injection equipment and testing materials given free to low-income and indigent diabetics.
4. Aiding research projects regarding possible prevention and better treatment of diabetes.

The Diabetic Association was formed some seven years ago, under the leadership of Dr. C. H. Best, co-discoverer of insulin, so important now in the treatment of diabetes, and Dr. A. L. Chute, Physician in Chief of the Hospital for Sick Children. The two doctors called together a group of diabetics and parents of diabetic children and asked them to form a Diabetic Association.

A charter for the group which grew from these early meetings was granted in 1933. Prior to this there had been no such body in the whole of Canada. There are now branches of the Association in every province with the exception of Prince Edward Island, and Manitoba.

## :: GEMS OF THOUGHT ::

### SELF-RESPECT

Every one stamps his own value on himself.

Self-reliance and self-respect are about as valuable commodities as we can carry in our pack through life.

Man is free born; he is neither the slave of sense, nor a silly amble to the so-called pleasures and pains of self-conscious matter.

Neither esteem anything as of advantage to thee that shall make thee break thy word or lose thy self-respect.

Resolve to be thyself; and know, that he who finds himself, loses his misery.

Canada, with a population of some 15 million, consumes 25 percent of all United States commercial exports. The U.S. buys about 60 percent of all Canadian exports.

## Scientists become frogmen in search for oil in Gulf of Mexico

Frogmen on floor of ocean seek specimens to be tested by geologists.

By GROVER BRINKMAN

Frogmen have a new job in Gulf of Mexico waters: searching for oil.

Operating from a 65-foot boat, scientists turned frogmen are working in water up to 65 feet in depth. Some of the exploration is 45 miles offshore, south and east of port of Galveston, Texas. These researchers are not hunting for offshore oil in the conventional sense. Offshore drilling locations are "spotted" by essentially the same geological and geophysical methods as used on dry land. Instead, these scientists in skin-suits are using the continental shelf as a gigantic field laboratory to study sediment deposits on the gulf floor.

Aqualung diving techniques, of course, were developed for military purposes during World War II. But the oil industry is the first to put these techniques to work for an industrial purpose.

These scientists, six in number, prepared for the underwater expedition by spending a week learning to dive in the San Marcos river, at San Marcos, Texas. When they finished the course, all of them were able to pass the diving test the U.S. Navy gives its frogmen.

Most of the oil fields so far discovered in the world are what geologists call "structural traps"—underground closures formed by subterranean rock layers folding and fracturing.

Some of the biggest oil finds—the great East Texas field for instance—have been in an entirely new type of trap called "stratigraphic," which are bars or reefs formed in ancient seas by gradual deposition of sediment over the centuries. These reefs and bars are extremely hard to find by conventional methods.

Many of the big oil fields of this type have been found by pure accident. Now the oil engineers are "combing" the gulf floor, hunting the sediment deposits that may point the way to stratigraphic traps.

While they "prospect" on the gulf floor, the frogmen collect samples of starfish, snails, shellfish and other marine and animal and plant life. They dive, dredge and core. Sediment samples brought up by dredge are stored in steel cans, carefully labelled as to location, then sent to laboratories for analysis.

To get samples of older sediments, several feet below the present gulf floor, the scientists use a coring barrel—an eight-foot steel pipe enclosing a plastic liner—which is lowered over the side, weighted on top, and plunged into the bottom. Later the plastic tubes containing the cores are pulled out of the pipe and sent to laboratories.

Skin-diving makes it possible for these scientists literally to crawl on the ocean floor, observing all marine flora and fauna at first hand in the clear, transparent waters.

They use a dandelion digger to loosen some of the specimens imbedded in the gulf floor. Photographs are taken with a camera mounted in a water-tight case.

Underwater notes are made on the spot, by writing with wax pencils on plastic slates strapped to their thighs.

Using a device called a current-meter, the divers calculate the force of underwater currents. It is very quiet on the gulf floor, according to these divers. One of them said he could hear the click of clams shuffling their shells as he approached.

Occasionally, the quiet is shattered by the sound of explosions. Another oil company, making a marine seismic survey a dozen miles away, was sending columns of water into the air for heights of 30 to 40 feet.

While the men on the boat could see the water-plumes they could

not hear the blasts. However, the skin-divers could hear the explosions very clearly on the bottom of the gulf.

The skin-divers reported that most of the fish they encountered were totally unafraid. Red snapper, angelfish, sheepshead, triggerfish, and many other beautifully colored tropical fish swam up and nudged the divers' face-masks, not at all alarmed by the intruders.

Two of these geologists, strangely, were near-sighted on land. However, they reported that when they donned their aqualungs and went down to the gulf floor, the near-sightedness vanished. Instead they could see better than their companions who had normal vision!

## Fall forage program to boost feed reserves

Saskatchewan farmers, especially those in the west and southwest parts of the province, would be wise to plan on sowing part of their acreage to forage crops this fall, according to R. E. McKenzie, director of the plant industry branch of the Saskatchewan Department of Agriculture.

The fall forage crop program offers two pasture and hay mixtures as well as special mixtures suited to alkali land or areas which flood periodically. All seed is available at low prices, and freight on shipments is paid by the department of agriculture.

In drier parts of Saskatchewan, the surest way to get a healthy stand is by seeding just before freeze-up in the fall. No land preparation is necessary since seed can be sown in stubble or where there is a weed cover. The stubble and weeds will hold snow which will provide moisture for germination early in the spring, getting seedlings off to a good start before hot, dry weather.

Late fall seeding should be done after October 15th. It is recommended to sow seed less than one inch deep, and in the brown and dark brown soil zones of the south and southwest hay-crops should be put in 12-inch rows.

Mr. McKenzie said it was likely prices of forage seed would be considerably higher next year because of the short seed crop this season. This fact, along with the knowledge that livestock and sufficient feed reserves on the farm every year should help farmers to decide to sow more forage crops this fall, said Mr. McKenzie.

Just last winter we were shown by the feed shortage which developed, that not nearly enough for-

## Funny and Otherwise

G. K. Chesterton was a large man, over six feet in height, weighing more than three hundred pounds. Bernard Shaw, Shaw, Chesterton's friendly enemy, was extremely thin. Meeting him one evening, G. K. told him, "To look at you, one would think there was a famine in England."

"And to look at you," Shaw retorted, "One would think you were the cause of it."

A Dallas, Texas, woman phoned her grocer and snarled, "Mr. Johns, I sent my son, Thurmond, for two pounds of grapes, and you sent me only one and a half pounds! Either your scales are crooked, or you didn't weigh these grapes."

"My scales are all right," replied the grocer. "Have you weighed Thurmond?"

"Little boy," asked the lady, "can you direct me to the bank?"

"Sure I can," answered the boy, "for a quarter."

"Isn't that rather a high price for such a little favor?" asked the lady.

"Not for a bank director, it isn't," replied the boy.

Age crops are grown in the province. It is only reasonable that on every farm one acre of grass-alfalfa mixture should be grown for every head of livestock kept.

Full information about the fall forage crop program may be obtained from Ag. Reps. municipal offices or the Department of Agriculture at Regina.

## get more than just freeze-up protection... PRESTONE BRAND ANTI-FREEZE TAKES OVER WHERE OTHERS STOP!

Corrosion in your radiator eats through metal—causes leaks. Prestone® Anti-Freeze guards against ruinous corrosion. Are you sure with other brands of anti-freeze? Cost of repairing radiator..... \$10.00 to \$15.00

A corroded, clogged cooling system causes overheating... and that means excessive cylinder wear. Prestone® Anti-Freeze allows your engine to run at proper temperatures for least wear. Are you sure with other brands of anti-freeze? Cost of re-conditioned engine..... \$250.00 to \$350.00

**PRESTONE**  
ANTI-FREEZE

Remember these pictures when somebody tells you all makes of anti-freezes are the same!

It could be an expensive winter unless you use the anti-freeze that protects against all the cooling system hazards your car's engine will have to face. Almost any anti-freeze gives you just freeze-up protection. But "Prestone" Brand Anti-Freeze does far more... takes over where others stop. It conditions your cooling system, guards against ruinous corrosion, helps reduce engine wear, helps keep your car running smoothly and efficiently. So ask for "Prestone" Brand Anti-Freeze. See that you get it. And if somebody tells you all anti-freezes are the same... remember how much it can cost you if you buy just freeze-up protection!

## This ORANGE and COCONUT CAKE is so easy to make!

Prepare  
1½ tps. grated orange rind  
½ c. cut-up shredded coconut  
Sift together twice  
1½ c. once-sifted pastry flour  
or 1½ c. once-sifted all-purpose flour  
2½ tps. Magic Baking Powder  
½ tsp. salt  
Cream  
7 tps. shortening

Gradually blend in  
1 c. granulated sugar  
Add, part at a time, beating well  
After each addition  
2 well-beaten eggs  
Sift in grated orange rind and coconut  
Combine  
¾ c. milk  
½ tsp. vanilla

Add dry ingredients to creamed mixture alternately with milk, combining after each addition. Turn into greased 8-inch square cake pan, lined in bottom with greased waxed paper. Bake in a moderate oven, 350°, 30 to 35 minutes. Cool, cut cake with Orange Butter icing.

You get lighter, more delicious baked goods when you use MAGIC Baking Powder. Dependable MAGIC protects all your ingredients. Buy MAGIC today!

## Local News

Last Sunday, October 14, Mr. and Mrs. George Lakness had a house full of relatives all the way from Camrose to Winter, Sask., in honor of Art and his bride who were back from Saskatoon for a visit. Art was married about two or three weeks ago. He has quit farming in the Avonlea district and now has a gravel truck and is living in Saskatoon.

The Rev. Leo Thurston, formerly of Ashmont, has been transferred to the Anglican church at Barrhead.

Mrs. Leo Thurston and boys are visiting here for a few days with Mr. and Mrs. P. T. Thurston while their household goods are moved to the new home at Barrhead.

Mrs. J. C. McLeon is at Wainwright this week visiting with her old friend Mrs. Watt. Art Peterson of Edmonton spent last week-end at Irma with his mother, Mrs. J. Peterson and other relatives.

The sympathy of all at Irma is extended to Mr. and Mrs. Wes Bacon on the passing of her mother, Mrs. Hunter of Birchhill, Sask. Mrs. Bacon had been with her for two or three months prior to her death.

The anniversary services and annual chicken supper will be held at the Irma United church November 25-26. More particulars to follow.

Mrs. R. L. Simmermon was an Edmonton visitor last week. Her daughter, Doreen, returned to Irma with her for the week-end. Mr. Smith was also a week-end visitor at the Simmermon home.

Mrs. I. T. Skiles of Ryley was a week-end visitor here at the home of her sister Mrs. E. P. Tomlinson.

Mr. Martin Knudson and Mr. D. H. Gunn are patients in the Viking hospital this week.

Tag Day for the Blind, under the auspices of the Irma W.I. will be held on Saturday, October 20. Give as generously as you can when "tagged" by the volunteer workers who will be out that day.

Irma W.I. members are asked for either two pies or doughnuts for the catering to the auction sale at Mr. Stockton's on Friday, October 26.

Mrs. Zoost returned to Irma last week after a holiday in Vancouver at the home of her sister.

Mrs. A. Enger and Mrs. C. V. Larson spent a day at Camrose last week.

Mr. and Mrs. M. Cooper of Buffalo Coulee have taken up residence in the house formerly occupied by Mrs. M. Chase. Mr. Cooper is a business partner with Mr. Erling Larson at Central Garage.

Miss A. Donoghue has returned from a holiday trip to Edmonton.

Canvassers for the British and Foreign Bible Society will be calling on you soon. All contributions will be appreciated.

The CWL are holding a bake sale in the Irma Food Market on Saturday, November 3 at 4 p.m.

Further donations in memory of Mr. Sivert Nelson have been received: To the United Church Memorial fund from Mr. and Mrs. J. Pastor; Mrs. Helena McKay, Donald and Jack; Fred and Lois Jack.

To the Cancer Fund from the Strawberry Plains W.I.; Mr. and Mrs. Bert Evans.

To the Christian and Missionary Alliance Building Fund from Mr. and Mrs. C. V. Olsen. To the Protestant Home for Children from Mr. and Mrs. J. Pond and family.

ATTENTION boys and boys! Irma 4H Beef Club will be re-organized soon. Watch for date of first meeting some time near the last of October. Get your calves in before the first of November as no new members will be accepted after that date. Plans for the year's program will be made at the first meeting starting with a bus tour. The L.O.B.A. is sponsoring a Halloween's dance in the North Irma community hall on Nov. 2. Weather permitting. All members please bring lunch. Watch for further posters.

### MEETING OF THE A.T.A. SUB-LOCAL

(From The Viking News)

A new executive was elected at the first meeting of the Viking-Kinsella ATA Sublocal held on October 10 in the Viking high school.

Members of the new executive are: R. Harris, president; Mrs. B. Empey, vice-president;

Miss L. Thielman, sec-treas.; J. R. Hemphill, councillor; A. Toronchuk, sports representative and E. Freimanis, press correspondent.

Some time was allowed for discussion of matters pertinent to teaching. The topic of supervision, as well as other professional questions, were analyzed and some conclusions were attained.
